PROFILE SUMMARY

Results-driven **DevOps Engineer** with **3+ years of experience** (including 6 months internship) in **CI/CD automation, Linux system administration**, and operational support across **testing and production environments**. Expertise in **Jenkins pipelines (declarative & scripted), Python scripting, Docker, and Kubernetes**, with additional experience in **Salesforce DevOps**. Proven track record in automating deployment workflows, troubleshooting production systems, and implementing security practices using tools like **Snyk**. Currently pursuing **M.Tech in Software Engineering (BITS Pilani)** to deepen expertise in modern DevOps and cloud technologies.

SKILLS

Programming & Scripting: Python, Shell Scripting (Bash), Groovy (Basic)

CI/CD & DevOps: Jenkins (Declarative & Scripted Pipelines), Docker, Kubernetes, Git & Github

Operating Systems: Linux (System Administration, Troubleshooting)

Cloud & Platforms: AWS, Salesforce DevOps

Security & Tools: Snyk (Vulnerability Scanning), Security Remediation, Secrets Management (Jenkins Credentials)

Monitoring & Support: Production Support, On-call Rotation, Incident Response, Weekend Upgrades

EXPERIENCE

Comcast, Chennai, India

Apr 2025 – Present

Engineer 2 - Engineering Operations

- Manage CI/CD pipelines using Jenkins (declarative & scripted) for testing and production environments, reducing deployment time by 40%
- Develop Python and shell scripts to automate operational tasks, improving efficiency and reducing manual intervention by 60%
- Implement security scanning using Snyk for repository vulnerability detection and remediation, addressing security tickets and ensuring compliance
- Manage secrets and credentials using Jenkins Credentials Manager with secure plugin integration for pipeline authentication
- Participate in on-call rotation and provide 24/7 production support, including weekend Salesforce platform upgrades and emergency deployments
- Optimize Salesforce DevOps workflows including release packaging, dependency handling, and versioning strategies
- Collaborate with QA and Configuration Management teams to track defects and coordinate incident response during sprint cycles

Comcast, Chennai, India

Jan 2025 – Mar 2025

Engineer 1 - Engineering Operations

- Built automated Salesforce compile pipeline using Jenkins declarative pipelines, reducing build time by 50%
- Developed Jenkins audit trail system for deployment tracking across testing and production environments
- Collaborated with development teams to troubleshoot and resolve issues in Salesforce deployments
- Maintained Git workflows and branching strategies for Salesforce metadata and application code, ensuring smooth version control operations

Comcast, Chennai, India

Jul 2023 – Dec 2024

Development Engineer 1

- Enhanced CI/CD pipelines using Jenkins, Docker, and Git for both application and Salesforce deployments, streamlining software delivery processes
- Participated in on-call rotation supporting critical production systems, resolving incidents and maintaining system health with 24/7 availability
- Coordinated with QA and Configuration Management teams for defect tracking, incident management, and sprint-based deployments
- Wrote shell scripts and Python automation to improve operational efficiency and reduce manual tasks
- Managed Salesforce release processes and collaborated with release teams for error-free deliveries
- Implemented secrets management best practices using Jenkins Credentials Manager for secure credential storage and access control

Comcast, Chennai, India

Jan 2023 – Jun 2023

Intern

- Supported deployment operations across testing environments and gained hands-on experience with Jenkins CI/CD pipelines
- Assisted in troubleshooting application issues in Linux systems and performed day-to-day operational tasks
- Contributed to Salesforce DevOps operations and learned release management best practices

PROJECTS

CI/CD Pipeline Automation with Security Integration – Automated build and deployment pipelines using Jenkins declarative and scripted pipelines. Integrated Snyk security scanning for vulnerability detection in repositories, reducing build time by 50% while ensuring security compliance. **Tools:** *Jenkins Scripted Pipeline, Snyk, Docker, Git*

Salesforce Full Compile Automation – Automated Salesforce compile pipeline using Jenkins Scripts, reducing build time by 50% and eliminating manual compilation errors. Implemented comprehensive error handling and notification system for build failures. **Tools:** *Jenkins Declarative Pipeline, Jenkins Credentials Management*

Release Management Automation – Developed Python and shell scripts to automate versioned release folder creation, dependency handling, and deployment processes across testing environments, improving traceability and rollback capabilities. **Tools:** *Python, Jenkins Declarative Pipeline*

Migration from ANT to Salesforce CLI – Led migration of legacy ANT-based Salesforce deployment pipelines to modern Salesforce CLI, improving reliability by 30% and simplifying developer onboarding process. **Tools:** *Groovy, Salesforce CLI, Jenkins, Docker*

Container Orchestration & Deployment – Managed containerized application deployments using Docker and Kubernetes, improving scalability and consistency across environments. **Tools:** *Docker, Kubernetes, Jenkins*

EDUCATION

BITS Pilani (WILP) Jan 2025 – Dec 2026
M.Tech, Computer Software Engineering

SSN College of Engineering Aug 2019 – May 2023
B.E, Electrical and Electronics Engineering (First Class with Distinction)

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
